Inventory file

The inventory file gives you the stock balance of your products at the end of the day. It is a full snapshot, not a list of changes. For changes during the day, use the inventory adjustments file.

Direction	Capacity to you
Folder	`OUT/Inventory` in your folder on `ftp01.capacityllc.com`
When	Daily at 23:50 US Eastern
What it holds	One line per product with its balance at the time the file was written. Version 5.0 has one line per lot.

How to read it

- `OnHand` is everything in the warehouse for the SKU, including stock that is committed, on hold or in quarantine.
- `Commited` is stock already allocated to orders that have not shipped yet. The column header is spelled `Commited`.
- `OnHand` excludes stock on hold or in quarantine; those are reported in their own columns where the layout has them.
- `Available` is the stock you can sell: `OnHand` less `Commited`. Use it to update the stock levels in your store.
- Quantities are in units (eaches).
- The file name carries the date, for example `Daily_Inventory_ZZ_20261110.txt`. There is one file per day; if Capacity writes the file again the same day, the new file replaces the earlier one.
- Replace your stock levels with the values in the file. Do not add them to the previous day's values.
- Pick up each file, then delete it or move it out of the folder. Capacity keeps a copy.

Versions

Version 3.0 has the eight core columns. Version 4.0 adds on-hold and quarantine quantities and three reference columns. Version 5.0 adds the lot number and expiry date, with one line per lot. New clients choose version 4.0 (one line per SKU) or version 5.0 (one line per lot). Version 3.0 is kept for existing clients.

Layout

File name	`Daily_Inventory_<owner code>_<yyyyMMdd>.txt, for example Daily_Inventory_ZZ_20261110.txt`
Delimiter	Tab
Header row	Yes, first line, with the column names below in this order
Columns	10
Quoting	Not supported. Values must not contain tabs, line breaks or double quotes.

#	COLUMN	TYPE	MAX LENGTH	REQUIRED	DESCRIPTION
1	`SKU`	Char	32	Yes	The Capacity SKU. A SKU with several lots has one line per lot.
2	`AltSKU`	Char	50	No	Alternate SKU or UPC recorded for the product. Empty when none is set.
3	`Description`	Char	100	No	Product description, as recorded in Capacity.
4	`OnHand`	Integer	10	Yes	Units of this lot in the warehouse that are not on hold or in quarantine, in eaches. For a product without lots, the product total.
5	`Commited`	Integer	10	Yes	Units of this lot committed to open orders that have not shipped yet. The header is spelled Commited.
6	`Available`	Integer	10	Yes	Units of this lot you can sell: OnHand less Commited.
7	`Price`	Decimal `Decimal(18, 2)`	20	No	Unit price recorded for the product, with two decimal places. Empty when no price is set.
8	`Category`	Char	50	No	Your product category, when one is set.

#	COLUMN	TYPE	MAX LENGTH	REQUIRED	DESCRIPTION
9	`LotCode`	Char	50	No	Lot number. Empty for a product without lot tracking.
10	`ExpiryDate`	Date `MM/DD/YYYY`	10	No	Expiry date of the lot. Empty for a product without expiry tracking.
