997 Functional acknowledgment

A 997 says whether a functional group passed the X12 syntax check, and which transaction sets in it were accepted or rejected. It does not confirm business content: a shipment is confirmed by the 945, a receipt by the 944.

Version and GS01	004010, `FA`
Capacity sends	One 997 for every 940, 943 and 832 file, to `OUT`, in the same run that processes your file, normally within minutes
You may send	One 997 for each 945 and 944 file, to `IN` or the folder agreed during onboarding. Optional

The Envelopes page describes the ISA, GS, GE and IEA segments that wrap the file.

997s Capacity sends

Capacity acknowledges every group it receives. AK1 returns your GS01 and GS06. Each AK2 loop returns the ST01 and ST02 of one transaction set, and AK5 gives its result.

AK9 (GROUP)	MEANING	WHAT CAPACITY DOES
`A`	Accepted	Processes every transaction set.
`E`	Accepted, errors noted	Processes the accepted sets. AK3 and AK4 describe the errors.
`P`	Partially accepted	Processes the sets with AK5 `A` or `E`. Sets with AK5 `R` are not processed.
`R`	Rejected	Processes nothing from the group.

For a set with errors, AK3 names the segment and its position, and AK4 names the element, the error and the value received. Correct the rejected sets and send them again in a new file with new control numbers.

997s you send

A 997 for a 945 or 944 is optional. If you send one, Capacity records whether each set was accepted.

- Put AK101 `SW` for a 945 or `RE` for a 944, and the GS06 of Capacity's file in AK102.
- Send one AK2 loop for each set, with its ST02 in AK202 and the result in AK501.
- AK9 gives the result for the group.
- Capacity reads AK1, AK2, AK5 and AK9. AK3 and AK4 are accepted and not used.

If you reject a 945 or 944, email itedi@capacityllc.com with the file name so that Capacity can correct and resend it.

Segment summary

AREA	SEGMENT	NAME	USAGE	MAX USE	LOOP
Heading	ST	Transaction set header	Mandatory	1	
Heading	AK1	Functional group response header	Mandatory	1	
Detail	AK2	Transaction set response header	Optional	1	AK2
Detail	AK3	Data segment note	Optional	1	AK3
Detail	AK4	Data element note	Optional	99	AK3
Detail	AK5	Transaction set response trailer	Mandatory	1	AK2
Summary	AK9	Functional group response trailer	Mandatory	1	
Summary	SE	Transaction set trailer	Mandatory	1	

Segments

ST: Transaction set header

Heading · Mandatory · max use 1

REF	ELEMENT	NAME	USAGE	TYPE	MIN/MAX	VALUES AND NOTES
ST01	143	Transaction set identifier code	Mandatory	ID	3/3	Always 997. • 997 Functional acknowledgment
ST02	329	Transaction set control number	Mandatory	AN	4/9	Control number of this transaction set, unique within the functional group. SE02 repeats it.

AK1: Functional group response header

Heading · Mandatory · max use 1

REF	ELEMENT	NAME	USAGE	TYPE	MIN/MAX	VALUES AND NOTES
AK101	479	Functional identifier code	Mandatory	ID	2/2	GS01 of the group being acknowledged. • OW Warehouse shipping order (940) • AR Warehouse stock transfer shipment advice (943) • SC Price/sales catalog (832) • SW Warehouse shipping advice (945) • RE Warehouse stock transfer receipt advice (944)
AK102	28	Group control number	Mandatory	N0	1/9	GS06 of the group being acknowledged.

AK2: Transaction set response header

Detail · Optional · max use 1 · loop AK2

One AK2 loop for each transaction set in the group.

REF	ELEMENT	NAME	USAGE	TYPE	MIN/MAX	VALUES AND NOTES
`AK201`	143	Transaction set identifier code	Mandatory	ID	3/3	ST01 of the set being acknowledged.
`AK202`	329	Transaction set control number	Mandatory	AN	4/9	ST02 of the set being acknowledged.

AK3: Data segment note

Detail · Optional · max use 1 · loop AK3

Sent for each segment with an error. Within the AK2 loop.

REF	ELEMENT	NAME	USAGE	TYPE	MIN/MAX	VALUES AND NOTES
`AK301`	721	Segment ID code	Mandatory	ID	2/3	ID of the segment in error.
`AK302`	719	Segment position in transaction set	Mandatory	N0	1/6	Position of the segment in the set, counting ST as 1.
`AK303`	447	Loop identifier code	Optional	AN	1/6	Loop identifier, when the segment is in a loop.
`AK304`	720	Segment syntax error code	Optional	ID	1/3	Segment error. • `1` Unrecognized segment ID • `2` Unexpected segment • `3` Mandatory segment missing • `4` Loop occurs over maximum times • `5` Segment exceeds maximum use • `6` Segment not in defined transaction set • `7` Segment not in proper sequence • `8` Segment has data element errors

AK4: Data element note

Detail · Optional · max use 99 · loop AK3

REF	ELEMENT	NAME	USAGE	TYPE	MIN/MAX	VALUES AND NOTES
`AK401`	C030	Position in segment	Mandatory	Comp	1/2	Position of the element in the segment.
`AK402`	725	Data element reference number	Optional	N0	1/4	X12 data element number.
`AK403`	723	Data element syntax error code	Mandatory	ID	1/3	Element error. • `1` Mandatory data element missing • `2` Conditional required data element missing • `3` Too many data elements • `4` Data element too short • `5` Data element too long • `6` Invalid character in data element • `7` Invalid code value • `8` Invalid date • `9` Invalid time • `10` Exclusion condition violated
`AK404`	724	Copy of bad data element	Optional	AN	1/99	Copy of the value in error.

AK5: Transaction set response trailer

Detail · Mandatory · max use 1 · loop AK2

REF	ELEMENT	NAME	USAGE	TYPE	MIN/MAX	VALUES AND NOTES
`AK501`	717	Transaction set acknowledgment code	Mandatory	ID	1/1	Result for this transaction set. • `A` Accepted • `E` Accepted, but errors were noted • `R` Rejected
`AK502`	718	Transaction set syntax error code	Optional	ID	1/3	Set error code, when the set has errors.

AK9: Functional group response trailer

Summary · Mandatory · max use 1

REF	ELEMENT	NAME	USAGE	TYPE	MIN/MAX	VALUES AND NOTES
`AK901`	715	Functional group acknowledge code	Mandatory	ID	1/1	Result for the whole group. • `A` Accepted • `E` Accepted, but errors were noted • `P` Partially accepted: at least one set was rejected • `R` Rejected
`AK902`	97	Number of transaction sets included	Mandatory	N0	1/6	Number of sets in the group (GE01).
`AK903`	123	Number of received transaction sets	Mandatory	N0	1/6	Number of sets received.
`AK904`	2	Number of accepted transaction sets	Mandatory	N0	1/6	Number of sets accepted.
`AK905`	716	Functional group syntax error code	Optional	ID	1/3	Group error code, when the group has errors.

SE: Transaction set trailer

Summary · Mandatory · max use 1

REF	ELEMENT	NAME	USAGE	TYPE	MIN/MAX	VALUES AND NOTES
`SE01`	96	Number of included segments	Mandatory	N0	1/10	Number of segments from ST to SE, both included.
`SE02`	329	Transaction set control number	Mandatory	AN	4/9	Same value as ST02.

Sample

The 997 Capacity sends for the 940 sample: one order, accepted.
